

## A Tool for Parents ...

Rubin Educational Resources' Unique Academic Rating Quiz ©

- Is your child struggling at school?
- Have your child's learning strengths and weaknesses been identified?
- Is your child challenged at school? Bored? Underachieving?
- Does your child have an undiagnosed learning or attention problem?
- Are you wondering if your child is dyslexic?
- Does your child experience math or test-taking anxiety?
- Does your child have difficulty making and keeping friends?
- Is your child abusing alcohol or drugs or associating with the "wrong crowd"?
- Is your child oppositional and defiant at home or school?
- Is your child disruptive or truant at school?
- Does your child need help in the college admissions process?
- Does your child need SAT/ACT test preparation?

Take a few minutes to rate your child's progress and/or your areas of concern. This free, private quiz will help you assess where your child fits on the *Education Planning Continuum™*.

After completing the quiz, please refer to our scoring table and the Planning Continuum for suggestions and recommendations based upon your answers. Not all questions will relate to your child.

Place an "X" in the appropriate column. If you believe a question is not applicable, answer "No".

<b><u>Academics</u></b>	<b>YES</b>	<b>NO</b>
Which of the following pertains to your child:

## *The Education Planning Continuum™:*

Based on the score your child received on the quiz, the following may apply:

### **High school age students:**

- **Score up to 23:**  
Ready for ACT/SAT test preparation, college admission essay assistance, and college placement counseling.
- **Score of 24-39:**  
Your child may have a learning disability. Educational testing is strongly suggested; your child may benefit from specialized school services and / or specialized school placement; for juniors and seniors - investigate extended time ACT/SAT testing and college placement counseling with possible emphasis on college programs recognizing learning differences.

For those children whose points *primarily* arise from behavioral problems, we encourage you to visit with a local independent educational consultant or contact us as soon as possible regarding school options and possible specialized school placement.

- **Score above 39:**  
We strongly suggest that you seek professional assistance immediately! Your child may need a specialty school placement, wilderness program, or therapeutic boarding school placement. As parents we recommend you seek guidance with rules and limits for your teen and monitoring progress. Your child may also need psychoeducational or diagnostic testing.

### **Students in Grades 1 – 8:**

- **Score up to 10:**  
Your student is off to a good start; keep up the good work, and set reasonable family rules and goals. If you are worried about a possible learning disability, consult a professional about testing.
- **Score of 11 – 20:**  
Educational diagnostic testing is recommended; your answers suggest that your child may be struggling with learning differences.
- **Score over 20:**  
Indicates a possible need for psychoeducational and/or diagnostic testing. A special needs school placement may be appropriate, particularly if your student is in 7<sup>th</sup> or 8<sup>th</sup> grade. A visit with a qualified professional is highly recommended.

*Our RECOMMENDATIONS AND SUGGESTIONS above are based upon your responses to the Academic Rating Quiz ©. No definitive conclusions can be drawn from this brief assessment. We strongly recommend follow-up with a professional in order to draw a full and accurate picture of your child's status. Contact us for further direction or assessment.*
